

our research and development

Scientific approach and inspiration, backed by close collaboration with major research centers such as CNRS (The French National Center for Scientific Research) and prestigious French hospitals and schools of pharmacy, have allowed LIERAC Laboratories to become a foremost brand in terms of innovation, credibility and product performance. This close partnership allows Lierac Laboratories to stay abreast on the latest scientific research discoveries such as: fibroblast activity, free radicals, Collagen Type III, skin aging and stem cell research, and allows us to deepen our knowledge of the physiological balance and health of the skin. Combine this knowledge with Lierac's botanical expertise and the result is an innovative and highly effective product range.

clinical studies

CRÈME MÉSOLIFT

- 98% Skin is more radiant and illuminated*
- 98% Skin appears more toned*
- 96% Skin feels smoother*
- 98% Skin feels rested*
- 96% diminishes appearance of wrinkles & fine lines*

*Subjective results after 28 days of use with 54 females aged between 41 and 60.
