

LIPOFILLING

VOLUME CORRECTION SKINCARE

Drawing inspiration from the most advanced dermatological procedures and the most recent cosmetic surgery techniques, LIERAC Laboratories introduces the 1st cosmeceutical range derived from the surgical techniques of lifting and lipofilling to help redefine facial contours and restore youthful volume.

RECOMMENDED FOR

Substantial loss of facial volume:

- Due to age
- Due to hereditary factors
- Due to dieting or medical treatment

PRODUCT AND PRICING

LIPOFILLING DAY (50ml jar)-MSRP \$98 USD

LIPOFILLING NIGHT (50ml jar)-MSRP \$106 USD

ACTIVE INGREDIENTS

1st combination of VOLUME + LIFTING

The volume complex:

COMMIPHEROLINE SPHERULITES®

This new generation ingredient helps to inhibit the disappearance of fat and reactivate the reconstruction of adipose tissue. It restores volume to the adipose tissue by balancing the biological processes of lipogenesis and lipolysis.

+

TRI-PEPTIDES

Strengthening the dermal architecture by stimulating fibroblastic synthesis of glycosaminoglycans (GAGs), these tri-peptides help restructure the dermis, increasing elasticity, boosting hydration and redensifying the skin.

The lifting action:

WHEAT BIOPOLYMERS + PURIFIED YEAST EXTRACT

From the first application, facial contours become redefined through a combination of biopolymers extracted from wheat which work to lift the skin on the surface. Purified yeast extract helps strengthen the dermal-epidermal junction for deeper-down lifting benefits.

RESULTS

The facial volume appears restored, the skin feels denser, more elastic and ideally moisturized. The face appears visibly rejuvenated.
